# **“A practical model for Threat hunting and Threat investigation”**

Key Note Speaker:

**Mr. Shyam Sundar Ramaswami**

Lead threat Researcher Asia Pacific

CISCO, India

16<sup>th</sup> July, 2020

The webinar by CSI Coimbatore Chapter was held on 16<sup>th</sup> of July 2020, at 7pm with overwhelming registrations. The speaker was Mr. Shyam Sundar Ramaswami, Lead threat Researcher Asia Pacific, CISCO on the topic “A practical model for Threat hunting and Threat investigation.

The chairperson of CSI Coimbatore Chapter, Dr. G. Radhamani welcomed all the participants and introduced the Keynote Speaker. The purpose of the webinar is to bring together scholars from a variety of places across the globe to promote discussion on techniques to fight against threats, share threat investigation and attacks.

The speaker discussed on how to prevent threats from entering the organization’s network components, such as antivirus, and firewalls. Today, many cyber-attacks cannot be detected solely with automated solutions, so more companies are using threat hunters to track and hunt APTs (Advanced Persistent Threats). Mr. Shyam also discussed about Ransom ware, spyware malware, bots and worms.

The discussion revealed the best way to check for spyware in the computer with anti-malware software. The anti-malware software deep scans the hard drive to detect and remove any threat lurking in the computer. He also discussed on threat hunting and investigations research in the developing world. The attendees raised the queries related to various threats. The session was an eye opener to the researchers and the students. Mr. N. Duraiswamy, Secretary, CSI-Coimbatore Chapter proposed vote of thanks.
