CHAIRMAN

SECRETARY

### About Office 365

With Office 365 you can:

- Deliver your best work with the latest version of Office.
- Use and access Office on virtually any device.
- Store, sync, and share files with OneDrive for Business.
- Stay connected and communicate with business-class email.
- Work better together with online meetings and conferencing.
- Trust a financially-backed 99.9% uptime guarantee.

### About Windows 10

- Windows 10 is designed to be compatible with the hardware, software, and peripherals you already own. And always-enabled updates help you stay current on features and security for the supported lifetime of your device.
- Windows 10 is the most secure Windows we've ever built. From first boot-up through the supported lifetime of your device, you're covered by enhanced security features that help protect against viruses, malware, and even phishing attacks.
- The Windows Insider Program is a global community of fans who love Windows and want to help make it better. Because they get to see new features first, Insiders have the opportunity to provide feedback to continue shaping the best Windows ever.
- For enterprise and power users, Microsoft has added the virtual desktops feature in Windows 10. Virtual desktops let you switch between many desktops as per your convenience. It is already present via third-party Windows tools, but will come built-in in the new Windows 10 OS.
- It should be noted that Apple's OS X, and many Linux distros already come with support for virtual desktops.

## About Quadra Systems

- Quadrasystems.net (India) Pvt Ltd. (QUADRA) is a globally recognized, award winning solution partner, providing software infrastructure consulting, services and solutions.
